

# Creating Tassel Build from Source Code

Terry Casstevens ([tmc46@cornell.edu](mailto:tmc46@cornell.edu))

April 21, 2014

## Requirements

Must have git installed. Check using this command...

```
git --version
```

Must have Java 7 installed. Check using this command...

```
java -version
```

Must have ant installed. Check using this command...

```
ant -version
```

## To Initially Download Tassel 4 Source Code...

```
git clone git://git.code.sf.net/p/tassel/code tassel4-src
```

## To Initially Download Tassel 5 Source Code...

```
git clone https://bitbucket.org/tasseladmin/tassel-5-source.git tassel5-src
```

## To Update Packages to Latest Source Code...

After the initial download, execute this command from within `tassel4-src` or `tassel5-src` to get the latest updates.

```
git pull
```

## To Create Build...

```
ant
```

After successful completion, you will find this file which can be used directly in this location or moved to another Tassel Standalone installation.

```
tassel5-src/dist/sTASSEL.jar
```
